PERSONAL INFORMATION

Date of Birth: 17th December 1993
Nationality: China
Institution: Department of Earth, Environmental and Planetary Sciences, Rice University
Address: 6100 Main Street, MS-126 Houston, TX 77005

GENERAL RESEARCH INTERESTS

My research interests focus on three aspects in igneous petrology:

1. Mantle melting and mantle heterogeneity in igneous provinces and ocean islands. I am interested in characterization of heterogenous mantle sources from major and trace elements, the degree of mantle melting accounts for the crustal thickness, trace element abundances in primary minerals
2. Crystallization kinetics, magma dynamics in magmatic systems. I am interested in understanding crystal size, texture, morphology and their responses to the change of magmatic conditions; Elemental diffusion and its application in addressing timescales in volcanic systems. Elemental partitioning under kinetic conditions.
3. Planetary interior structure, evolution and interior-atmosphere interactions. I am interested in using HTHP phase equilibria experiments to understand magma ocean and core/mantle differentiation of rocky planets.

To carry out my research, I use experiments combing with numerical modelling, thermodynamics, statistics, textural and geochemical analyzes

EDUCATION & ACADEMIC APPOINTMENTS

Rice University **03. 2024 – present**
CLEVER Planet postdoc associate *Houston, TX*

KU Leuven **06. 2019 – 02. 2024**
PhD in Geology *Leuven, Belgium*

University of Liège **10. 2018 – 04. 2019**
Visiting scholar *Liège, Belgium*

China University of Geosciences (Beijing) **09. 2016 – 05. 2019**
Master in Geology *Beijing, China*

China University of Geosciences (Beijing) **09. 2012 – 07. 2016**
Bachelor in Geology *Beijing, China*

LABORATORY EXPERIENCE

- **Experimental petrology:**
  1 atm gas mixing furnace
  Over 300 runs with 1 atm high to low-temperature experiments, kinetic cooling experiments
  Piston cylinder apparatus:
  Experienced in 1-2GPa half inch experiments, capsule, assemblage preparation
- **Electron microprobe:**
  Over 1000 hours experience with EPMA, experienced in instrument calibration, analytical method development, high precision measurement, mapping
- **Scanning Electron Microanalysis:**
  Imaging of BSE and SE

- **X-ray tomography (nanotom system):**
  Experienced in geo-material 3D scanning, data processing
- **NanoSIMS:**
  Two week analytical experience, data reduction on mapping, trace element analysis
- **LA-ICP-MS:**
  Data reduction and analysis

COMPUTER SKILLS

- Fluent in programming with python, including package development, numerical modelling, data analysis, PCA analysis.
- Proficient with Matlab, numerical modelling.
- Standard knowledge of shell scripting, julia, web building language including Django framework, HTML and CSS. Vim enthusiast.
- Experienced with thermodynamic modelling software: alphaMELTs family; MAGEMin; PerpleX
- Experienced with scientific writing in Word, LaTeX, Overleaf
- Experienced in design and editing with Adobe Illustrator, Photoshop, Premiere

FIELD WORK EXPERIENCE

2023 Eifel volcano, *Germany, 2 days*
2022 Fogo volcano, *Cape Verde, 1 week*
2018 Changbai Mountain *North China, Tianchi volcano, 2 weeks*
2018 Yunnan *China Tengchong volcano, 2 weeks*
2018 Emeishan Province *China, 2 weeks*
2018 Zhangjiakou *North China, Yaojiazhuang complex, 1 week*
2014 Akesu, Xinjiang *China, Gold deposits, 3 weeks*
2013 Zhoukoudian *China, field mapping courses, 4 weeks*
2012 Beidaihe *China, excursion, 3 weeks*

PRIZES & AWARDS

2023 University of Münster, Early career postdoc fellowship (declined)
2023 Belgian FWO travel grant for Rocky World III, Zurich, 2023 (€500)
2023 Belgian FWO travel grant for Goldschmidt, Lyon, 2023 (€500)
2018 Institute travel grant for attending Goldschmidt, 2018 (¥12000 = USD 1700)
2018 National Awards for Excellent Graduate Students (¥30,000 = USD 4300, 1%)
2014.12 Third prize in professional course. (15%)
2014.6 Third prize in professional course. (15%)
2014.5 Fourth prize in Institute Scientific Research Activity.

SERVICES

Conference participation:
2023 Primary convenor, Goldschmidt 2023, *Dynamics and timescales in magmatic reserviors, conduits and dikes, (proposal writing, session convenor)*
Journal reviewer:
American Mineralogist, GCA, Communications Earth & Environment

TEACHING

2022 Soil Science & Geology (practical, igneous rocks)
2021 Soil Science & Geology (practical, igneous and sedimentary rocks)

SUPERVISION

1. Soetkin Willemyns, Mantle melting and mantle mineralogy in exoplanets. *Master. 2023*
2. Kinjal Ganguly, Interior structure and mineralogy of exoplanets. *Master. 2023*
3. Lander Cuypers, Experimental study of olivine morphology. *Bachelor, 2021*
4. Sarah Stammen, Experimental study of olivine and spinel equilibrium. *Master. 2020*

PUBLICATIONS

Peer reviewed journal publications

1. Jin Z, **Zhang Y**, Bose M, Glynn S, Couffignal F. (2024). Petrogenesis of Erg Chech 002 Achondrite and Implications for an Altered Magma Ocean. *The Astrophysical Journal 965(1), 24.*

INVITED TALKS

1. **Zhang Y**. Magmatic differentiation and thermal structure of large igneous provinces *2023. Guangzhou Institute of Geochemistry, Chinese Academy of Sciences.*
2. Namur O, Charlier B, Cartier C, **Zhang Y**, Nittler M, Collinet M, Grove T, McCammon C. Sulfur chemistry in planetary interiors - Effects of reducing conditions. *2023. Department of Physics and Astronomy, KU Leuven.*
3. Namur O, Tosi N, Shorttle O, Cartier C, Lin Y, **Zhang Y**, Saracino F, Liado L, Pirotte H, Charlier B. Mercury's mantle as constrained by its crust. *Goldschmidt 2023 keynote talk.*

CODE DEVELOPMENT

1. Li W, **Zhang Y** – pyAp, a package for calculating magmatic volatile, trace element concentrations, and oxygen fugacity using mineral apatite. *python*
2. **Zhang Y** – Mass balance calculation for petrology using non-negative and matrix decomposition algorithms, with MCMC propagating errors on phases and bulk composition. *python*
3. **Zhang Y**, Namur O, Gerve TDV – Multi-component olivine diffusion, integrated with uncertainties of temperature, pressure, oxygen fugacity. *python*
4. **Zhang Y** – Stepwise backward F-test model for multiple linear regression. *python*
5. **Zhang Y** – Script converts alphaMELTS output to formatted spreadsheet. *python*
