PERSONAL INFORMATION

Date of Birth: 17th Decemeber 1993

Nationality: China

Institution: Earth and Environmental Sciences, KU Leuven

Address: Celestijnlaan 200E, 3001 Leuven

RESEARCH INTERESTS

My research interests focus on two aspects in igneous petrology:

1. Crystallization kinetics, magma dynamics in magmatic systems. I am interested in understanding the crystal size, texture, morphology and their responses to the change of magmatic conditions; Elemental diffusion and its application in addressing timescales in volcanic systems. Elemental partitioning in the kinetic conditions.
2. Mantle melting and mantle heterogenous in igneous provinces and ocean islands. I am interested in characterization of heterogenous mantle sources from major and trace elements, the degree of mantle melting therefore accounts for the crustal thickness, trace element abundances in primary minerals
3. Phase equilibria. Particularly to understand interior structure and geochemical composition of rocky planet.

To carry out the research, I use experiments combing with numerical modelling, thermodynamics, statistics, textural and geochemical analyzes

My PhD projects focus on using high temperature high pressure facilities to understand

1. the differentiation, immiscibility and thermal structure of large igneous provinces
2. crystallization kinetics in basaltic system

Beside experimental study, I am very passionate about coding, software development, data analysis.

EDUCATION & ACADEMIC APPOINTMENTS

Universität Münster

Postdoc fellow

01. 2024 – present

Münster, Germany

KU Leuven

PhD in Geology

06. 2019 – 01. 2024 (expected)

Leuven, Belgium

University of Liège

Visiting scholar

10. 2018 – 04. 2019

Liège, Belgium

China University of Geosciences (Beijing)

Master in Geology

09. 2016 – 05. 2019

Beijing, China

China University of Geosciences (Beijing)

Bachelor in Geology

09. 2012 – 07. 2016

Beijing, China

LABORATORY EXPERIENCE

- **Experimental petrology:**

1 atm gas mixing furnace

Over 300 runs with 1 atm high to low-temperature experiments, kinetic cooling experiments

Piston cylinder apparatus:

Experienced in 1-2GPa half inch experiments, capsule, assemblage preparation

- **X-ray tomography (nanotom system):**

Experienced in geo-material 3D scanning, data processing

- **Electron microprobe:**
Over 1000 hours experience with EPMA, experienced in instrument calibration, analytical method development, high precision measurement, mapping
- **Scanning Electron Microanalysis:**
Imaging of BSE and SE
- **LA-ICP-MS**

PC SKILLS

- Fluent in programming with python, including package development, numerical modelling, data analysis, PCA analysis.
- Proficient with Matlab, numerical modelling.
- Standard knowledge of shell scripting, julia, web building language including Django framework, HTML and CSS. Vim enthusiast.
- Experienced with thermodynamic modelling software: alphaMELTS family; MAGEMin
- Experienced with scientific writing in Words, LaTeX, Overleaf
- Experienced in design and editing with Adobe Illustrator, Photoshop, Premiere

FIELD WORK EXPERIENCE

2023 Eifel volcano, *Germany, 2 days*
2022 Fogo volcano, *Cape Verde, 1 week*
2018 Changbai Mountain *North China, Tianchi volcano, 2 weeks*
2018 Yunnan *China Tengchong volcano, 2 weeks*
2018 Emeishan Province *China, 2 weeks*
2018 Zhangjiakou *North China, Yaojiazhuang complex, 1 weeks*
2014 Akesu, Xinjiang *China, Gold deposits, 3 weeks*
2013 Zhoukoudian *China, field mapping courses, 4 weeks*
2012 Beidaihe *China, excursion, 3 weeks*

PRIZES & AWARDS

2023 Belgian FWO travel grant for Goldschmidt, 2023 (€500)
2018 Institute travel grant for attending Goldschmidt, 2018 (¥12000 = USD 1700)
2018 National Awards for Excellent Graduate Students (¥30,000 = USD 4300, 1%)
2014.12 Third prize in professional course. (15%)
2014.6 Third prize in professional course. (15%)
2014.5 Fourth prize in Institute Scientific Research Activity.

SERVICES

2023 Primary convenor, Goldschmidt 2023, *Dynamics and timescales in magmatic reservoirs, conduits and dikes*
 Journal reviewer: American Mineralogist

TEACHING

2022 Soil Science & Geology (practical, igneous rocks)
2021 Soil Science & Geology (practical, igneous and sedimentary rocks)

SUPERVISION

1. Kinjal Ganguly, Solubility of S in the Mercurian mantle. *Master. 2023*
2. Lander Cuypers, Experimental study of olivine morphology. *Bachelor, 2021*
3. Sarah Stammen, Experimental study of olivine and spinel equilibrium. *Master. 2020*

PUBLICATIONS

Journal publications

1. **Zhang Y**, Namur O, Charlier B. 2023. Experimental study of high-Ti and low-Ti basalts: liquid lines of descent and silicate liquid immiscibility in large igneous provinces. *Contrib. Mineral. Petrol.* 178(1):1-24.
2. Dekoninck A, Rufet G, Baptiste J, Wyns R, Philippo S, **Zhang Y**, Namur O 2022. Petrogenesis and $^{40}\text{Ar}/^{39}\text{Ar}$ dating of epithermal romanechite from the sub-aerial fault-related Romanèche Mn deposit (France). *Chemical Geology.* 121280
3. **Zhang Y**, Hou T, Veksler IV, Leshner CE, Namur O, 2018. Phase equilibria and geochemical constraints on the petrogenesis of high-Ti picrite from the Paleogene East Greenland flood basalt province. *Lithos*, 300-301,20-32.

Conference Abstract

1. **Zhang Y**, Namur O, Charlier B, 2023. Magmatic differentiation and silicate liquid immiscibility in large igneous province. EMPG-XVIII 2023. *oral*
2. **Zhang Y**, Namur O, Charlier B, Holness MB, 2023. A general model for olivine growth rate and morphology. Goldschmidt 2023. *poster*
3. Namur O, Tosi N, Shorttle O, Cartier C, Lin Y, **Zhang Y**, Saracino F, Liado L, Pirotte H, Charlier B. 2023. Mercury's mantle as constrained by its crust. Goldschmidt 2023. *keynote talk*
4. Saracino F, Charlier B, **Zhang Y**, Namur O, 2023. The role of sulfur on liquidus temperature and olivine-orthopyroxene equilibria in highly reduced magmas. Goldschmidt 2023. *poster*
5. Pirotte H, Cartier C, Pommier A, Namur O, **Zhang Y** Berndt J, Klemme S, Charlier B. 2023. Investigating Mercury's internal structure and volatile budget using trace elements partitioning experiments. Goldschmidt 2023. *poster*
6. Shepherd K, Namur O, Bachmann O, **Zhang Y**, Hendrickx T, Charlier B, 2022. Timescales and Petrological Processes in an Area of Plume-Ridge Interaction: Insights from the Islands of Terceira and Flores, Azores. AGU 2022 *oral*
7. **Zhang Y**, Namur O, Charlier B, Li W, Shorttle O, Gazel E, Jennings ES, Thy P, Grove TL, 2022, A re-evaluation of Al-in-Olivine geothermometer. Goldschmidt 2022 *oral*
8. **Zhang Y**, Namur O, Charlier B, 2020. Experimental liquid lines of descent and Silicate Liquid Immiscibility for low-Ti and high-Ti basalts of the Emeishan Large Igneous Province, SW China. AGU 2021. *poster*

10. **Zhang Y**, Hou T, Veksler IV, Leshner CE, Namur O, 2018. Phase equilibria and geochemical constraints on the petrogenesis of high-Ti picrite from the Paleogene East Greenland flood basalt province. Goldschmidt Abstract 2018. *oral*

In progress

1. **Zhang Y**, Namur O, Li W, Shorttle O, Gazel E, Jennings ES, Thy P, Grove TL, Charlier B. (under review in JPet). An extended calibration of the olivine-spinel aluminum exchange thermometer: Application to the melting conditions and mantle lithologies of large igneous provinces.
2. Pirotte H, Cartier C, Pommier A, Namur O, **Zhang Y** Berndt J, Klemme S, Charlier B (under review in Icarus). Internal differentiation and volatile budget of Mercury inferred from trace element partitioning experiments at highly reduced conditions.
3. **Zhang Y**, Namur O, Charlier B, Bouvier AS(in prep). Kinetic partitioning of trace elements in olivine.
4. **Zhang Y**, Namur O, Charlier B, Holness MB (in prep). A general model for olivine growth rate and morphology.
5. Li W, **Zhang Y** (in prep). PyAp: a python package for calculating magmatic volatile, trace element concentrations, and oxygen fugacity using mineral apatite. Code available at <https://github.com/alexweiranli/pyAp>

INVITED TALKS

1. Namur O, Charlier B, Cartier C, **Zhang Y**, Nittler M, Collinet M, Grove T, McCammon C. Sulfur chemistry in planetary interiors - Effects of reducing conditions. 2023. *Department of Physics and Astronomy, KU Leuven.*
2. Namur O, Tosi N, Shorttle O, Cartier C, Lin Y, **Zhang Y**, Saracino F, Liado L, Pirotte H, Charlier B. Mercury's mantle as constrained by its crust. *Goldschmidt 2023 keynote talk.*

CODE DEVELOPMENT

1. Li W, **Zhang Y** – pyAp, a package for calculating magmatic volatile, trace element concentrations, and oxygen fugacity using mineral apatite. *python*
2. **Zhang Y** – Mass balance calculation for petrology using non-negative and matrix decomposition algorithms, with MCMC propagating errors on phases and bulk composition. *python*
3. **Zhang Y**, Namur O, Gerve TDV – Multi-component olivine diffusion, integrated with uncertainties of temperature, pressure, oxygen fugacity. *python*
4. **Zhang Y** – Stepwise backward F-test model for multiple linear regression. *python*
5. **Zhang Y** – Script converts alphaMELTS output to formatted spreadsheet. *python*
